Exosome Therapy - The Future of Skin & Hair Revival

Imagine turning back the clock on your skin and hair naturally. Exosome therapy uses billions of tiny healing messengers to wake up dormant cells, boost collagen, and stimulate new hair growth where you thought it was gone forever.

Why it works so well:

- Proven Results: Most clients see visible transformation in just **3-4 weeks**
- High Success Rate: Up to **90%** improvement in **skin smoothness and hair density**
- **Zero Downtime**: Walk in, walk out—look fresher every day after
- Backed by Science: The same technology leading clinics worldwide use

This isn't just a treatment—it's your cellular reset button. You don't have to "hope" it works. You'll see and feel the change, day by day.

NEW ARRIVAL

The **Aakar DRS1512 Skin Booster** is a powerful solution that reduces wrinkles, improves skin texture, and repairs damaged skin.

With its unique blend of 3 nucleic acids, natural extracts, and essential vitamins and minerals, it deeply nourishes and revitalizes the skin.

By stimulating collagen production with growth factors, enzymes, and peptides, it enhances skin firmness and elasticity while restoring moisture for a youthful, glowing complexion.

Ideal for all skin types, this booster offers an all-in-one treatment for smoother, healthier, and more radiant skin.

NEW ARRIVAL

The Bluecore Q-Switch ND:YAG Laser: Imported from Korea, offers advanced laser technology for a variety of aesthetic and dermatological treatments.

This high-performance device effectively targets and treats skin pigmentation, tattoos, and vascular lesions.

Featuring precise energy delivery and adjustable settings, the Bluecore Q-Switch ND:YAG Laser ensures safe and efficient results for all skin types.

Ideal for professional use, it combines reliability with cutting-edge innovation for superior patient outcomes.

TYPES OF N-DYAG TREATMENTS

CARBON FACIAL

A revolutionary laser treatment that deeply cleanses and exfoliates the skin, reducing oiliness, acne, and enlarged pores. It leaves your complexion smoother, brighter, and more refined.

TATTOO REMOVAL

Safely and effectively remove unwanted tattoos with minimal discomfort and downtime, suitable for all ink colors and skin types.

BLUETONING FACIAL

A gentle laser treatment designed to improve skin tone and texture. It effectively reduces pigmentation, minimizes pores, and enhances overall skin clarity, leaving your skin looking radiant and even-toned.

PIGMENTATION TREATMENT

Targets and reduces hyperpigmentation, age spots, and sun damage, restoring a more even skin tone.

ACNE SCAR TREATMENT

Minimizes the appearance of acne scars, promoting smoother and clearer skin.

MELASMA TREATMENT

Specifically targets melasma, providing a safe and effective solution for even the most stubborn pigmentation.

MOST POPULAR

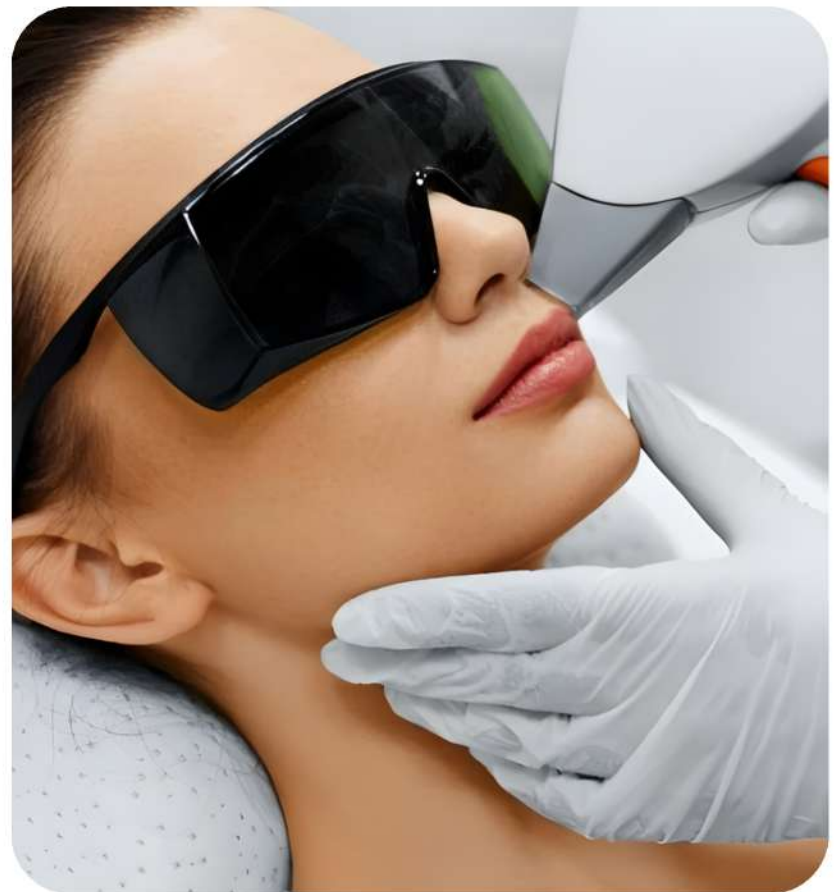

Diode Laser Hair Removal :This state-of-the-art laser treatment offers a permanent solution for unwanted hair. The diode laser targets hair follicles with precision, ensuring effective and long-lasting results.

It is suitable for all skin types, providing a fast, comfortable, and virtually painless experience. With advanced cooling technology, the treatment minimizes discomfort and protects the skin, making it a safe choice for both large and small areas of the body.

MOST IN-DEMAND

HydraFacial This advanced, non-invasive facial treatment offers a comprehensive skincare solution in a single session. It combines deep cleansing, exfoliation, extraction, hydration, and antioxidant infusion, tailored to your skin's needs.

The HydraFacial uses a unique Vortex-Fusion delivery system to painlessly remove impurities and infuse the skin with hydrating and nourishing serums.

Suitable for all skin types, it improves texture, tone, and overall skin health, leaving your complexion refreshed, revitalized, and radiant.

TYPES OF FACIALS

ADVANCED HYDRA FACIAL

This enhanced treatment combines deep cleansing, exfoliation, extraction, hydration, and antioxidant infusion for comprehensive skin rejuvenation. Suitable for all skin types, it leaves your complexion refreshed, revitalized, and glowing.

KOREAN GLASS FACIAL

Inspired by Korean beauty secrets, this treatment aims for a flawless, glass-like complexion. It combines deep cleansing, gentle exfoliation, and intense hydration with specialized Korean skincare products. Achieve smooth, radiant, and pore-free skin with a luminous glow

TYPES OF FACIALS

FIRE & ICE FACIAL

This intensive treatment alternates between a warming mask to exfoliate and stimulate skin renewal and a cooling mask to soothe and hydrate. It effectively reduces fine lines, wrinkles, and blemishes, leaving your skin refreshed, rejuvenated, and radiant.

GOLD FACIAL

This luxurious treatment uses gold-infused products to rejuvenate and brighten the skin. It stimulates collagen production, reduces fine lines and wrinkles, and enhances skin elasticity, leaving your complexion radiant and glowing.

MOST EFFECTIVE

Chemical Peel is an advanced skin treatment that uses a specially formulated chemical solution to exfoliate and remove the damaged outer layers of the skin. It targets various skin concerns, such as acne scars, hyperpigmentation, fine lines, and uneven texture.

By promoting the regeneration of new, healthy skin cells, chemical peels enhance the overall appearance and texture of your skin.

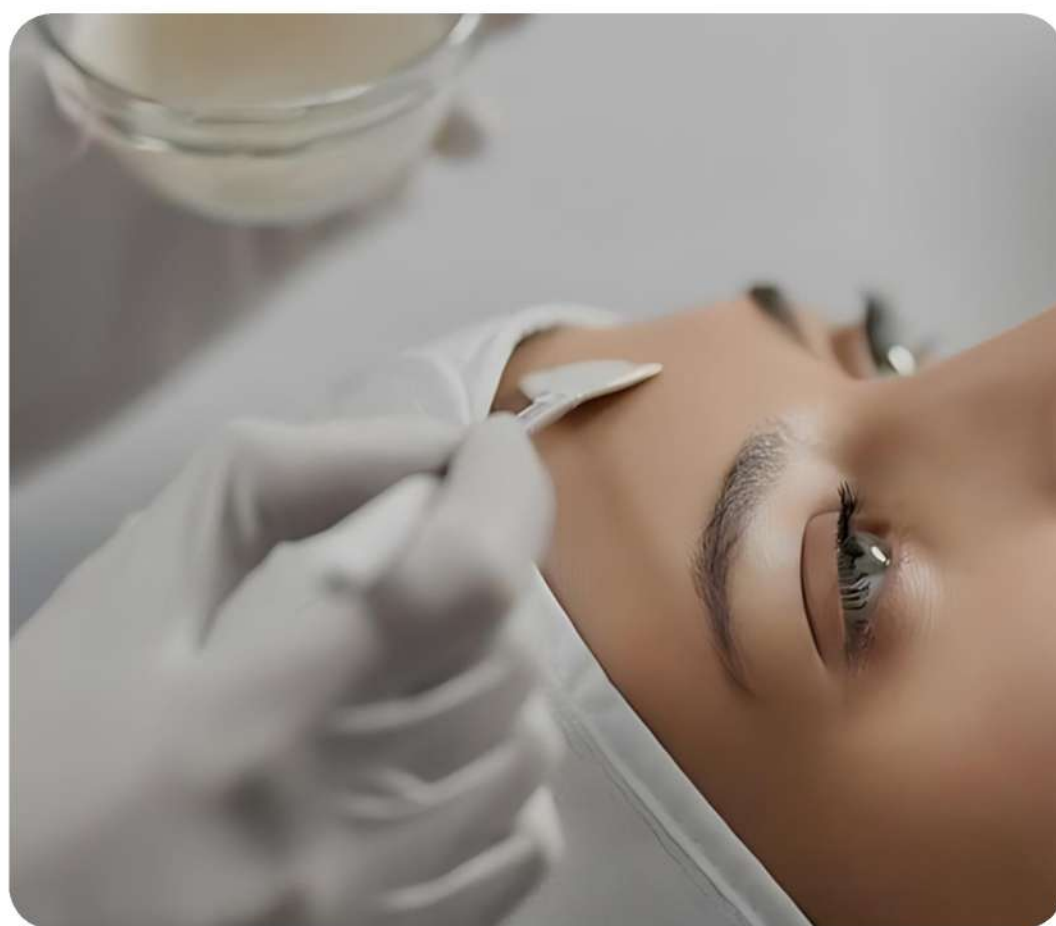

Available in different strengths, from superficial to deep, the treatment is customizable to suit your specific needs and skin type, resulting in a smoother, brighter, and more youthful complexion.

TYPES OF PEELS

ACNE PEEL

A targeted treatment that exfoliates and unclogs pores to reduce acne and improve skin clarity.

GLOW PEEL

An invigorating treatment that exfoliates and brightens the skin, enhancing radiance and promoting a luminous, even-toned complexion.

GLYCOLIC PEEL

This exfoliating treatment uses glycolic acid to remove dead skin cells, improve texture, and brighten the complexion, revealing smoother and more radiant skin.

TYPES OF PEELS

SALICYLIC PEEL

This treatment utilizes salicylic acid to exfoliate and deeply cleanse the skin, targeting acne and reducing inflammation, resulting in clearer, smoother, and more balanced skin.

RETESIS CT YELLOW PEEL

This advanced peel combines retinoids and a yellow-colored solution to improve skin texture, reduce pigmentation, and stimulate collagen production, resulting in a brighter, more even-toned complexion.

SKIN AGING?

Anti-Ageing Treatments: Our advanced anti-ageing solutions encompass specialized facials, laser therapies, and chemical peels to reduce fine lines, wrinkles, and age spots.

These treatments stimulate collagen production, improve skin elasticity, and enhance skin texture.

Whether through deep hydration, targeted exfoliation, or laser precision, our treatments rejuvenate your skin, restoring a youthful and radiant appearance.

TYPES OF ANTI-AGING TREATMENTS

MICRONEEDLING RF

This treatment combines microneedling with radiofrequency energy to stimulate collagen production, tighten skin, and reduce wrinkles, resulting in a smoother, more youthful complexion.

PLATELET RICH PLASMA

This therapy uses your own blood's platelets and growth factors to rejuvenate skin, stimulate collagen production, and promote hair growth, offering a natural and effective anti-aging solution.

MESO THERAPY

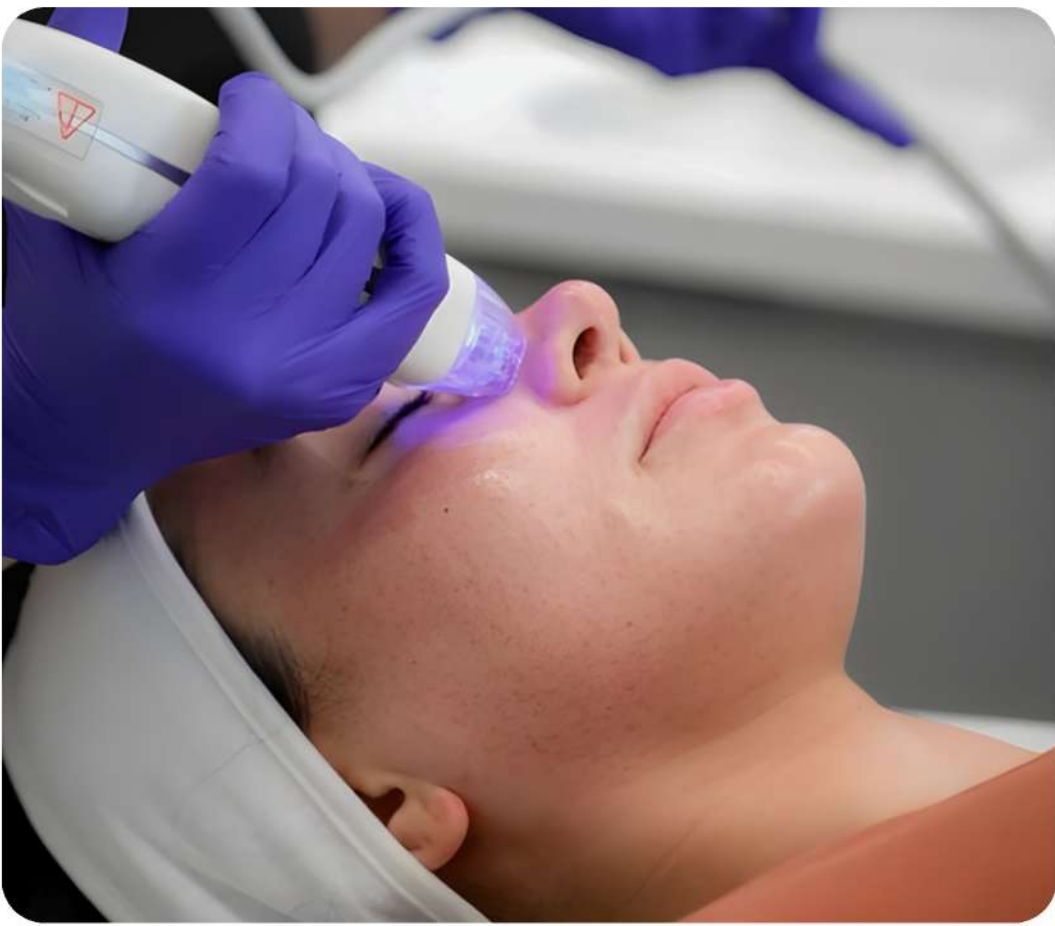

This treatment involves injecting vitamins, enzymes, and plant extracts into the skin to rejuvenate, tighten, and hydrate. It effectively treats cellulite, fat reduction, and hair loss, promoting a healthier, more radiant appearance.

TYPES OF ANTI-AGING TREATMENTS

HYALURONIC ACID DERMAL FILLERS

These injectable treatments use hyaluronic acid to restore volume, smooth fine lines and wrinkles, and enhance facial contours. They provide immediate, natural-looking results, giving your skin a more youthful and refreshed appearance.

RADIOFREQUENCY TREATMENT

An invigorating treatment that exfoliates and brightens the skin, enhancing radiance and promoting a luminous, even-toned complexion.

HYALURONIC ACID DERMAL FILLERS

This exfoliating treatment uses glycolic acid to remove dead skin cells, improve texture, and brighten the complexion, revealing smoother and more radiant skin.

POPULAR WORLDWIDE

Glutathione: This intravenous therapy infuses the body with glutathione, a powerful antioxidant known for its detoxifying and skin-brightening properties.

By delivering glutathione directly into the bloodstream, the treatment enhances overall wellness, supports liver function, and boosts the immune system.

It also helps to lighten and even out skin tone, reduce pigmentation, and promote a radiant, youthful complexion. This treatment is ideal for those seeking to improve their skin's appearance and overall health from the inside out.

TYPES OF ANTI-AGING TREATMENTS

BOTOX

This popular injectable treatment uses botulinum toxin to temporarily relax facial muscles, reducing the appearance of fine lines and wrinkles. It provides a smoother, youthful look with results that typically last 3 to 6 months.

FILLER

These injectable treatments add volume and fullness to areas of the face, smoothing wrinkles and enhancing contours. They provide immediate, natural-looking results and can be used to restore volume, define features, and rejuvenate the skin.

TIRED OF BODY/BELLY FAT ?

Cryolipolysis: Also known as **CoolSculpting**, this non-invasive procedure uses controlled cooling to freeze and eliminate stubborn fat cells.

A specialized applicator targets specific areas like the abdomen, thighs, and flanks, causing fat cells to undergo natural cell death and be gradually removed by the body.

With no surgery or downtime, it offers noticeable, long-lasting results within 1-3 months, providing a more contoured and sculpted appearance.

FOR WEIGHT & INCH LOSS

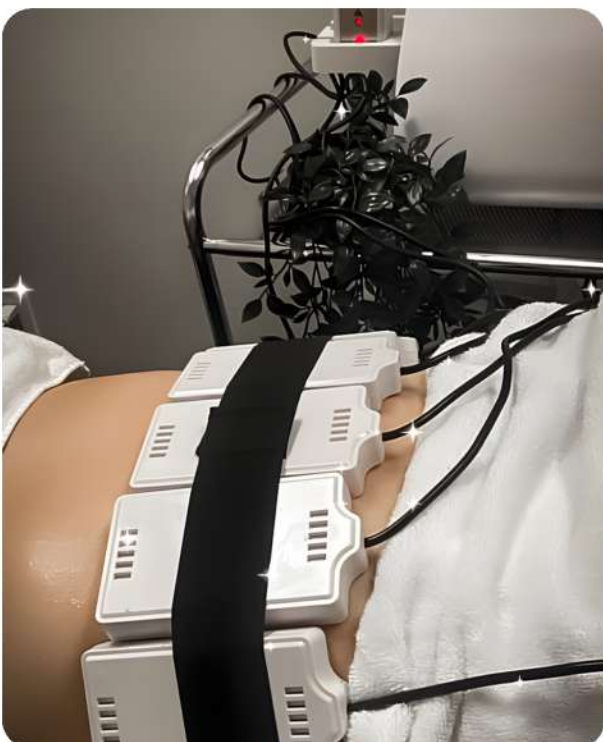

U-LIPOLYSIS

This non-invasive treatment uses ultrasound technology to target and break down fat cells, which are then naturally eliminated by the body. It effectively contours and sculpts areas like the abdomen and thighs without surgery or downtime.

CAVITATION

This non-invasive procedure uses ultrasound technology to break down fat cells, promoting fat loss and body contouring. It targets stubborn areas, offering a safe and effective alternative to liposuction.

EMS VIBRATION

This treatment uses Electrical Muscle Stimulation (EMS) combined with vibration technology to contract and relax muscles, enhancing muscle tone and promoting fat loss. It's an effective way to improve body contour and muscle definition without intense workouts.

FOR WEIGHT & INCH LOSS

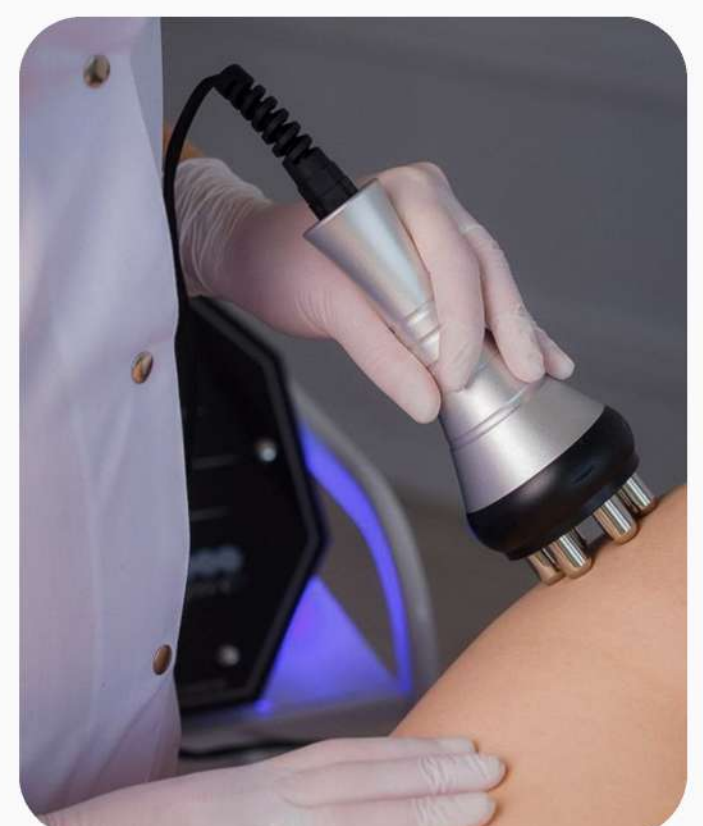

CELLULITE REDUCTION

This treatment targets and reduces the appearance of cellulite through techniques like radiofrequency, laser therapy, or massage. It smooths and firms the skin, enhancing overall texture and contour for a more even and toned look.

RADIO FREQUENCY TREATMENT FOR SLIMMING

This non-invasive procedure uses radiofrequency energy to heat and break down fat cells, promoting fat loss and skin tightening. It effectively contours and sculpts the body, reducing cellulite and improving overall skin texture without surgery.

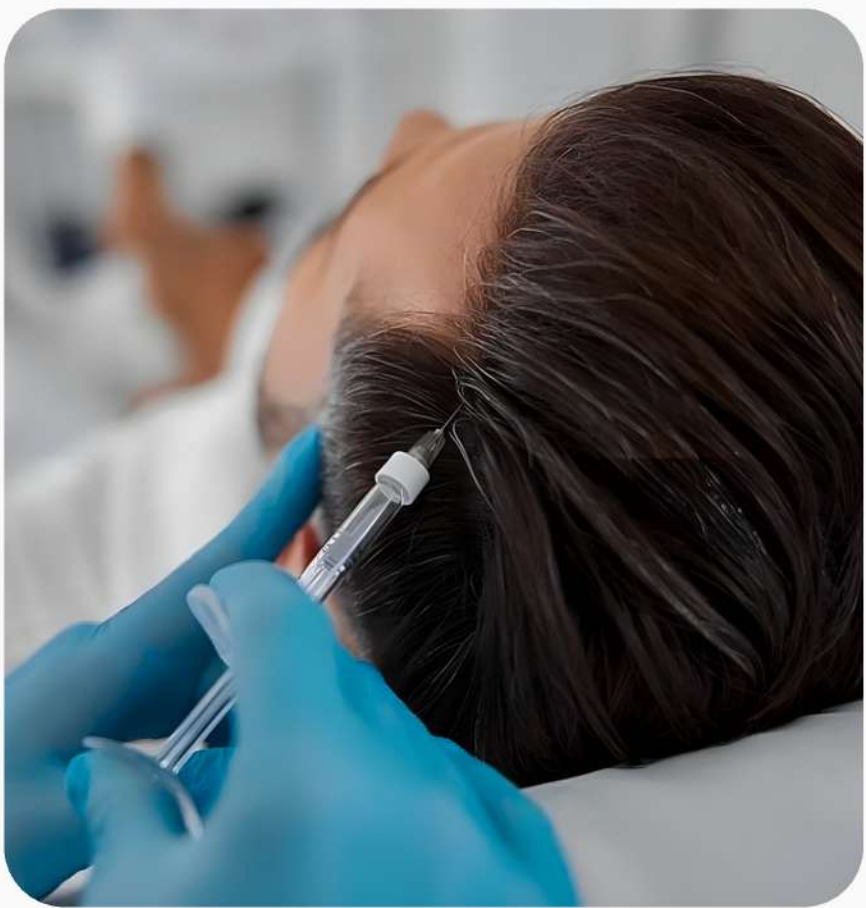

FOR HAIR REJUVINATION

PLATELET RICH PLASMA

Injects your own plasma into the scalp to stimulate hair follicles and promote hair growth.

EXOSOME

Uses stem cell-derived exosomes to stimulate hair follicles, promote hair growth, and improve hair density.

PLATELET RICH PLASMA WITH BOTOX

Combines PRP's hair follicle stimulation with Botox's scalp relaxation to promote hair growth and improve hair density.
